CITY MAY MAKE VERY GOOD DEAL ON DEBENTURES

Review of Whole Bond Situation
Shows That Every City Has
to Pay More.

TORONTO BONDS SELL FOR
LESS THAN IN 20 YEARS

Montreal's Latest Issue, 4.12 Per
Cent, Over-subscribed at
Point Far Below Par.

The time is now close at hand when the definite announcement may be expected as to the details of the sale of the \$10,000,000-dollar debenture loan for the sale of which Edmonton is now negotiating. It is understood that an excellent price is to be received, when the present state of the bond market all over the world is taken into consideration. The special committee of the council had another meeting yesterday in regard to the venture sale.

As summing up the situation, and offering an excellent reply to various intelligent criticisms that have been directed at the city administration in disposing of the recent debenture issue, the following information, collected from various sources, is of interest:

There is at present a monetary stringency existing throughout the entire world, which has caused prices in Canadian municipalities to drop all along the line. Furthermore, there has been a great deal of discussion in England about the increase in imports in Canada over the exports. The higher cost of living has had its effect, and higher rates of interest are being demanded by investors in England generally.

Higher Interest Demanded.
Presiding at the Anglo-Canadian Finance company's meeting in London, J. F. Tennant, a director, referred to the recent unfavorable response to Canadian loans in London. "The immense competition for Canadian government and municipal securities by British financial houses," he said, "was entirely responsible for alleged over-borrowing." Canada had been able to borrow money on the most favorable terms in the past, and the shareholders that competition was now at an end and Canadian cities, except perhaps those of the highest rank, would in future have to pay at least a higher rate of interest, which would undoubtedly be considered a reasonable rate with satisfactory security.

It is the opinion in the City of London that London is not turning its back to fresh offerings of Canadian municipal bonds. It is true, she is financing the issues only on a higher basis, demanding 2 per cent, and over instead of 4-1-4. There has naturally followed a let-up in city flotations, but it cannot be connected with any discrimination against the borrower. Canada is feeling the effect, with the rest of the borrowing world, of the tendency of the money market to greater reticence. Coupled with this is the concerted condition of the London security market.

Underwriters Left With Big Portion.
As a result of the money tension, numerous issues originating in all parts of the world have simply failed of public allotment, and underwriters have been compelled to carry large portions of them.

There is no denying that Canadian municipalities have made heavy drafts on London savings," says the Montreal Times. "They have not taken as a whole, the large quantities of preference. The country is expanding in all directions at a prodigious rate. The annual increment of 400,000 souls to her comparatively small population of 5,000,000 affords a fair index of growth. Her capital needs, present and future, are growing commensurately. Generally speaking, values have not taken on inflated proportions. The real estate speculation, sometimes pointed to as justifying some mixing in regard to Canada's credit, is being kept within limits. To this the traditionally conservative policy of the banks has contributed in no small measure."

Toronto Gets Low Price.
The latest example of American firms purchasing Canadian bonds is the purchase of \$1,000,000 of Toronto's four per cent bonds due July 1, 1922, by N. W. Harris & Co., of Montreal and Boston. "This firm will offer the bonds immediately in London, Montreal, Toronto and various large American cities at 92.4 to yield 4.7 per cent. This is the lowest price at which Toronto bonds have sold in twenty years, except during the panic of 1907."

Saskatoon, Too.
The city of Saskatoon's last issue upon the London market was at 10 per cent, less than the preceding issue.

In February, 1912, the city of Regina sold the public at 4.70 per cent. This bond was 4-1-2 per cent, 30-

THIEF EXILED AND IMPOVERISHED WOMEN—Miss Angella Malero, Mrs. F. J. Malero, Sr., and Miss Mercedes Malero, who are now exiled from Mexico.

year straight-term debentures. The value at this price is 95.50. The last sale of Prince Albert debentures was at 111.5 per cent. That figures out at 12 for a 4-1-2 per cent, 30-year debenture. In one case here the wholesale rate is quoted, and in the other case the retail rate is quoted. It shows a loss of 13 per cent. If held to the same rate in each case the loss would be about 10 per cent.

It should be kept in mind that the expense of selling a bond in Great Britain are 2 per cent. It is not to be expected that brokers will pay more for bonds to be marketed in America than they would for bonds to be sold in Great Britain, and if there is any saving in expense on this side the tendency is to give the public the benefit of this saving.

It should be remembered that the difference of one-half of 1 per cent in the yield on a 10-year bond equals about 4 per cent in the price, whereas in a 30-year bond a difference of one-half of 1 per cent in the yield represents about 8.6 per cent in the price.

Criticism Unfair.
The writer of an article in an evening paper which criticizes the city's latest sale, overlooks the fact that long term bonds should secure favorably from the city's point of view than short term bonds, for the public demand for long term bonds is much greater than for short term bonds.

He also overlooks the fact that the expense of selling short dated bonds are just as great as the expense of selling long dated bonds. The amount chargeable for expenses is fixed by the country market, and it is something over three per cent. It is true that there is less machinery involved in handling debentures on this side of the ocean. Nevertheless, the city cannot expect to get the benefit of this fact. For brokers, naturally, are unwilling to pay any more for a block of bonds, 98 or 99 cents, on this side than they would pay if the same

bonds were to be handled in Great Britain. The broker does not take for himself the full benefit of the three per cent, but he gets property value the public part of the benefit in order to induce him to buy in a market which is clamoring on all sides.

Montreal's Recent Issue.
The city of Montreal 4-1-2 per cent, 20-year bonds, the being offered to the public today at 4.70 per cent. These are long term bonds and long term Hamilton bonds should sell at the same price as short term Toronto. And in fact, exactly what is happening, for the short-term Toronto are being offered to the public on a 4.70 per cent. basis.

Price Was Comparatively Low.
The city of Montreal drew of \$1,425,000 4-1-2 per cent, registered stock at 97 and interest, has been over-subscribed in the London market. This result, considering recent happenings as regards Canadian issues, may be considered highly satisfactory.

It is an application from the Dominion municipalities to London for money are concerned, whereas it still felt here because Toronto did not sell 4-1-2 per cent stock instead of 4 per cent bonds. If the had done so, it is contended, Montreal would probably have got better terms, and there would be no need of the present situation.

32,000 Turkish Soldiers Surrender to Besiegers

Athens Goes Wild Over News of Fall of Turkish Fortress so Gaily and Stubbornly Defended Since Commencement of Balkan War—Turks in a Panic.

Athens, Greece, March 6.—The Turkish fortress of Janina, the Turkish possession in the Province of Epirus, with its garrison of 32,000 men, surrendered to the Greek army today, after a defense which forms one of the most brilliant episodes of the Balkan war. The surrender was preceded by a fierce bombardment, lasting several hours, which did not spare the garrison. Every available gun, including a number of heavy howitzers, sent by the Serbian artillery, was brought to bear on the forts defending the beleaguered camp.

Turkish Casualties Substantial.
No fewer than 20,000 shells were fired by the Greek guns during the first day. Gradually the Turkish batteries at Janina, Monastir, and elsewhere, were silenced. The Greek commander, by a fold led the Turks to believe that their attack would be made from the right, as most of the positions of the defenders had been dismantled. The Greeks hurled large bodies of infantry against the Turkish left. The Ottoman troops, utterly surprised, fell back in disorder.

The defense batteries on the heights of Hissari, the mainstay of the defenders, had been unable to stand the pelting of the shells and were reduced to complete silence yesterday morning.

The Greeks pushed their forward movement during the afternoon and occupied the Turkish batteries on the Sakni and Bala hills, capturing all the guns and 118 artillerymen. Then the Greek batteries gradually dropped on the plain in front of the city Janina.

Turks Held in Panic.
The Turkish flight immediately became general despite the efforts of the Ottoman officers to rally the men. The Greek forces followed in hot pursuit almost to the walls. With all the defending batteries in the hands of the Greeks and the Hellenic soldiers at the gates of Janina, Rana Pasha, the Turkish commander, at 4 o'clock this morning, sent messengers under a flag of truce to Crete, the headquarters of Greece, announcing the surrender of the city and all the troops under his command.

Announcement of Surrender.
The fall of Janina was announced by the crown prince to the Greek war office in the following dispatch: "The Greek army, after a heroic struggle, has occupied the entire left front of the city of Janina."

FATAL RESULT NOT FEARED.
Dr. Roche is in the Physical Condition for His Coming Operation.

Minneapolis, Mar. 6.—Word from Rochester, N. Y., today, says that Dr. J. W. Roche, the Canadian cabinet minister of the interior, will be operated upon for gall bladder trouble on Saturday, at St. Mary's hospital. It is said that the operation will be for the removal of stones in the kidney, if necessary. No evil results are expected from the operation. Dr. Roche is in the physical condition.

True Bill Against Evelev.
Winipeg, March 6.—A true bill was brought in at the city court, charging the case of Walter Evelev, who was charged with the charge of subornation of perjury.

90,000 People Came Into This Province Last Year

Population of Alberta Now Half a Million—Twelve Years Ago it
Was 65,000—This Year's Immigration Will be Greater
Than in the Year 1912.

Alberta's share of the 1912 im-
migration into Canada amounted, on
the completion of Chas. S. Hot-
chin, the provincial statistician, to
30,000, bringing up the population of
the foothold province to approximately
half a million. The increase in
population during last year equalled
24 per cent. Indications are that this
percentage will be beaten by the re-
turns for 1913, judging by advices
from points in the United Kingdom,
America and other countries. Im-
migration figures published with re-
spect to the provinces by the Domi-
on Government do not include the
very large immigration from other
provinces of the dominion. Accord-
ing to these figures Alberta received
in the fiscal year 1911-12 immigrants
numbering 45,951, while for nine
months of the present fiscal year the
returns show 35,940. Six years ago
the year's immigration numbered
17,459.

Million By 1914.
Twelve years ago the population of
Alberta was 65,000; in 1904 it was
125,000, and the 1911 census gave the
figure 255,000. Today the popula-
tion is very near the half million
mark and if the same rate of increase
is maintained for the next five years,
as there is every indication that it
will be, the population of the province
will have reached nearly a million.
50,000 More On Land.
There were 15,000 homestead en-
tries last year and statistics show
that for each entry during the pre-
vious year the number of persons who

went on the land was 3.19. On this
basis Alberta had an increase in her
population on the land alone, last
year of 50,000 souls, who will occupy
not less than 2,500,000 acres, while
a conservative estimate of the in-
creased population in the four capi-
tal cities of Alberta, Edmonton,
Calgary, Lethbridge and Medicine
Hat, is 25,000, although a much
larger number is claimed.

Towns Increased.
The following towns report large
increases during the past year: Bas-
sano, Red Deer, Vermilion, Athabasca
Landings, and Edmonton. The increase
in these places together with the 8-
600 men employed upon railway con-
struction, the 8,000 men who came
from eastern Canada to assist with
the harvest, and the 451 school teach-
ers who came to Alberta from other
places and were given certificates to
teach here, place the actual immigra-
tion figures for the year at about 90-
000 people. It is estimated that at
least 30,000 settlers came to Alberta
last year, and that the average
wealth per capita has been placed at
\$1100, or a total value in effects and
cash of \$1300,000.

More Than Share.
The British settlers landed a
larger percentage of farmers with
means and experience for agricultur-
al life than the Canadians. The total
immigration formed rather more
than 12 per cent of the total im-
migration to the Dominion, this being
the first time that Alberta has received
more than her proportionate share
among the provinces.

GARMENT WORKERS IN RIOT IN ROCHESTER

Police Justice Declares He Will Im-
pose Penitentiary Sentences On
Disturbers in Connection With the
Strike.
Rochester, N. Y., March 6.—The
striking garment workers here opened
the day today with rioting, in which
1,500 persons participated. The rioting
district was torn down with the de-
monstrators, who wrecked the rest
rooms furnished by the factories for
their employees, and pelted the work-
ing shops with ice shovels and
hundreds of windows were smashed
and broken glass littered the streets.
The police used their clubs freely.
Numerous arrests were made, in-
cluding several young men. Police
Justice Chassey announced that
he would mete out penitentiary
sentences to all disturbers.

UNSAFE TO DO BUSINESS WITHOUT RATES AGREED

Declares Manager Winner of United
Line Touting at Government's
Suit Against Steamships.
True.
New York, March 5.—It would be
unsafe for the trans-Atlantic steam-
ship companies to do business with-
out a rate agreement, in the opinion
of Herman Winter, manager of the
United Line, who testified today before
the government's dissection suit
against the so-called steamship trust.
"Every rate war," Mr. Winter ex-
plained, "has tended to bring all the
steamship companies into collision."
The entire service has been greatly
improved through the stable rates.
Unrestricted competition among
the trans-Atlantic lines would
result in the ruin of the smaller
and weaker companies and dis-
courage the formation of new com-
panies."
Engineers Are Mooted.

Caracas, Venezuela, March 5.—Jury
D. Jorge and William L. Taylor, of Del-
aware, there is some doubt as to
whether they were captured by Motorists last week while
making religious pilgrimages in the vi-
cinity of Lake Maracaibo, have been re-
leased, according to advice received at
Caracas today, and both are safe.

City Charter Amendments Are Submitted Too Late

Legislature Will Not Have Time to Consider Proposed Amendments
to Charter During Present Session—May Urging Passing
of Two Important Amendments.

According to John A. McDougall,
member for Edmonton in the legisla-
ture, there is some doubt as to
whether the Edmonton charter amend-
ments "passing the legislature this session."
The amendment submitted this session
is asked, and this, too, is likely to be
left over for the next session. Owing
to the delay in presenting the Ed-
monton charter bill and the further
delay in getting the bill through the
hands of the government printer, it
appears that the many amendments
that this city is asking will not be
approved this year.
It is possible that an effort will be
made to have at least the two most
important amendments to the char-
ter submitted this session. These are
to enable the city to compile the
votes' list at an earlier date than
in the past, and to more clearly
define the tenants' qualifications; and
to enable the city clerk to have the
right to make treasurers.
The necessity of getting the vot-
ers' list presented earlier than in the
past is apparent to all who are ac-
quainted with present conditions. The
voters' list today contains over 20,
000 names, and the mere physical

BIG MONEY IN BUTTER FOR THE EXPORT TRADE

Canadian Trade Commissioner At
Manchester Deals With Antismug-
gling Charges in Butter Markets
and Supplies of World.

Ottawa, March 5.—The butter trade
of the United Kingdom is the sub-
ject of a highly interesting report
to the trade and commerce depart-
ment from W. J. Bean, Canadian
trade commissioner at Manchester.
Mr. Bean says, make great changes
in the sources of supply, and a much
reduced supply will consequently
bring higher prices in the near fu-
ture. It is hoped that Eastern Can-
ada will take more of the butter
being shipped in large quantities to
Vancouver, to be used in large towns
of the West, or colonial butter to
Montreal or shipping cream to the
United States or Holland, or Dan-
mark and Finland shipping butter
and cream to Germany.

Yet these are common places of
the butter trade in the year 1912.
The increased exportation of con-
tinental butter by Germany, will, in
the general opinion of the trade here,
bring about a great change in the
sources of supply, and a much re-
duced supply will consequently
bring higher prices in the near fu-
ture. It is hoped that Eastern Can-
ada will take more of the butter
being shipped in large quantities to
Vancouver, to be used in large towns
of the West, or colonial butter to
Montreal or shipping cream to the
United States or Holland, or Dan-
mark and Finland shipping butter
and cream to Germany.

Another "Unsettled" Case.
Minneapolis, Minn., March 5.—Pro-
fessor Oscar Olson, a demonstrator in
the University Farm school, last night
was charged with "harboring a
driver for the Capital laundry, St.
Paul, at the Olson home, 21. Nurse
street, midway. Olson gave himself
up to the police. He is said to have
denied the crime, and in the pres-
ence of the Ramsey county attorney,
H. D. O'Brien, made the statement
that he had long waited for the oppor-
tunity to kill Darling. He said he ob-
jected to the attention Darling was
showing his wife.

**SALE OF BINDER MAY
DEPEND ON WHISKEY**

Independent Implement Dealer Gives
Evidence in Suit Against Inter-
national Harvester Co.
Omaha, Neb., March 5.—The sale of
a binder or a mower often depends
on the brand of whiskey sold. This
was the subject of testimony today
before the federal grand jury at
Omaha, Neb. The witness was
Robert H. Taylor, who was the
manager of the International Harvester
company's sales office in Omaha.
Taylor testified that he had been
asked to sell binders and mowers
on the condition that the buyer
must buy a certain amount of
whiskey. He said that he had
refused to do so, and that he had
been threatened with violence if
he did not comply. He said that
he had been told that if he did not
comply, he would be "killed."

**WILL TRY TO COERCE
THE SUFFRAGETTES**

Want Hunger Strikers Sent To Hos-
pital Until Health Restored
London, March 6.—It is understood
that the government has decided to
introduce a bill in parliament as
early as a date as possible, dealing
with the suffragette difficulty. The
bill will empower the home secretary
to exercise the same licensing con-
trol over persons committed to pris-
on as he now does over convicts. This
a suffragette prisoner adopting the
hunger strike will be sent to a hos-
pital or a home until her health has
been restored, and would then be
committed to prison. This method
would be repeated until the prisoner
had served the full term, in which
the time out on license would not be
counted.
The second bill will provide a bet-
ter procedure for reckoning fines and
damages from suffragettes convicted
of attacks on property and will otherwise
modify the criminal law in the
desired direction.
G. T. F. is Passed.
Ottawa, March 5.—The senate to-
day considered in committee a bill
authorizing the government to fix the time
for completing the prairie sec-
tion of the Grand Trunk Pacific,
which was discussed yesterday and
held for information. Hon. Mr.
Lougheed said he had learned where
the principle came from. The origi-
nal act of 1905 provided that the
government should fix the time for
completion. He gave assurance that
the government would be prompt to
comply with the bill passed to raise
funds by disposing of the bonds on
the London market. A letter from
the solicitor of the company stated
this.

University Seeking Solution of Alberta's Economic Problems

Provincial Seat of Learning is Being Kept Closely in Touch With Practical Needs of Province—Assaying Minerals and Testing Building Materials Undertaken by Laboratories—Study in Farm Biology and Chemistry—Mining Engineering Course Will be Added This Year.

The complete adjustment of the University of Alberta to the needs of the province is recorded in the annual report of the university for the session 1911-12 which has just been tabled in the legislature. The report also states that 1912, the year of the student and staff, has been a year of great need for such an institution. The work of the scientific departments is keeping closely in touch with the practical needs of the province and the university is now in a position to tackle many of the economic problems of agricultural and industrial Alberta.

Increase in Students.
Up to the end of the session 1911-12 there were taking the arts and applied science courses 185 students, while it is expected that by the end of the present session this number will be increased fifty per cent. There were registered in the University of Alberta Colleges, the two affiliated colleges, in addition to the above, seventy-one, making a total of 256. This makes an increase in the number of students of 44 per cent for the year. If the students in the colleges are included the increase is 59 per cent. Of the 185 students in the university proper there are 157 men and 28 women. The number of students to women has increased from three to one in the last year, and is now five to one. While the number of women students has practically remained unchanged a large increase has taken place among the men. The number of students in the sciences has increased from 43 to 109, while in ten cases the age was not given. The average age is 23 years. The students belong to 13 different religious affiliations, the largest proportion being Methodists. Presbyterians coming next and Anglicans third. Fifty-nine of the students were born in the province.

Emphatic Commendation.
There are thirty-five distinct undergraduate art courses in the university, giving a total of 706 students, an average of twenty students to each course. With respect to the work being accomplished in the academic courses report says there is nothing to be said. The standards and spirit remain the same. The most emphatic commendation of the university's general plan of instruction, arrangement of courses and the results of making courses comes from students on the roll, who have done a portion of their college work elsewhere, and are therefore in a position to institute comparisons and contrast. It may not seem amiss to conclude this brief report, after repeating the statement of the last year: "We are dealing with a body of students in which 'lectures' are the serious business of life, and are attended to with real regularity."

Amidst the Year.
During the year the government placed under the charge of the university the examination of the practice of medicine and dentistry in the province. The Alberta Medical Association and the Alberta Dental Association, thus becoming affiliated with the university. The association of the year, the Alberta Association of Architects also applied for affiliation under similar conditions. The association was granted by the senate. Negotiations were under way to bring the Law Society under a similar arrangement, and it is hoped that before the end of the year 1912-13 the Law Society will be affiliated with the university.

learning facilities will have associated themselves with the university.

Course of Building.
The most important event of the year was the opening of Athabasca Hall, the first of a group of university residences. In addition to residential accommodation for about fifty students the building occupies seven class rooms, including an assay laboratory and testing laboratory, a fitting room, temporary offices for purposes of administration, a dining room, a dissection room and kitchen, capable of accommodating the students in residence. The residential accommodation has all taken the first day of registration, and the class rooms were all crowded to their capacity during the whole of the year. The second residence was begun almost immediately after the opening of the college year and when completed this building will provide five additional class rooms and also residential accommodation for about fifty students. A new building to provide dining room accommodation for the students has also been undertaken. It is hardly necessary to repeat the details of the building, the report states, to emphasize the necessity of a building which will provide a dining room for the students, a building which will provide a dining room for the students, a building which will provide a dining room for the students.

New Departments.
On the advice of the senate the following new departments were organized during the year, and will be in full operation during the present session: biology, geology, chemistry, physics, mathematics, and the department of mining engineering. The department of mining engineering was organized during the year, and will be in full operation during the present session. The department of mining engineering was organized during the year, and will be in full operation during the present session.

the crushing of stone, brick, cement, blocks, etc., the bending strength of beams of wood or steel, and the tensile strength of steel or iron wire. The cement testing apparatus has been constantly in use in connection with the material being used in the university buildings as well as for private work. The assay laboratory has also been largely used to meet a constant demand for the determination of mineral substances in rock and ore of various kinds. It is no longer necessary to send to distant laboratories to get this work done.

Testing Problems.
The biological laboratory was opened at the beginning of the present session and is also devoted to practical work. Research will begin as soon as possible in connection with some of the problems now pressing upon the farming community, especially in relation to diseases of grain and vegetables. The geological department will also be closely called to practical work, in connection with a study of the mineral wealth of the province, about which little is yet known. The department of mining engineering during the session 1912-13. All of the departments of engineering have a common course for the first two years, students who entered the university during the session 1911-12, intending to study mining engineering.

Ottawa, Feb. 19, 1913.

Scene I.
The little, lean, lank man with the long dark hair at his red head band and stroked his chin. He is well pleased with himself for he chews the end of a lingering reverie. There is nothing like a good beard to keep a man young. Moreover having a great virtue for him Zoroaster has said that to have friends one must be capable of making enemies. The little, lean, lank man has plenty of enemies and is a good hand, make no doubt of that. Just now he is pleasantly engaged in hating his present company. It warms the cockles of his heart to think how much he despises everybody in the Federal Cabinet except himself. He feels toward them a good-natured contempt. He is hait and the rest of them are Joffs.

The little, lean, lank man chuckles inwardly at the way he is getting on. They would choose a young ass for Finance Minister, would they, just because he had no past and had never broken the eleven hundred mark. They would choose a young ass for Finance Minister, would they, just because he had no past and had never broken the eleven hundred mark. They would choose a young ass for Finance Minister, would they, just because he had no past and had never broken the eleven hundred mark.

WILSON'S INVALIDS' PORT

A BIG BRACING TONIC

"The weary find new strength in generous wine"—Homer.

There Is No Mystery

about Wilson's Invalids' Port Wine. Its ingredients, natural, old Porto Wine and extract of the Peruvian Cinchona Bark etc.—have been employed in combination by the Medical Profession since the seventeenth century. In fact, so safe and so thoroughly reliable a preparation is it considered that several years ago the recipe was incorporated in the official Pharmacopoeias of England and France, and entrusted to domestic administration. And Wilson's Invalids' Port Wine actually improves on the Pharmacopoeia tonic in that the disagreeable taste of Cinchona is effectively covered and the wine made deliciously palatable for even the most sensitive and fever-weakened stomach. AMBU

EVERY HOME NEEDS IT

A few minutes after Zam-Buk is applied to a cut, a burn, a scratch, or any sore place, the pain is stopped. Mothers should never forget this, because it is one reason why Zam-Buk is the best thing for children's injuries. It stops their crying and gives them ease. Right from the instant of application healing begins, and Zam-Buk has no side effects. Note these statements from reliable persons, some of whom you may know.

Baby's Sore Healed—
"My baby girl had a bad sore on her chin, which was very painful, and caused her to be very restless. We put on Zam-Buk, and in a wonderfully short time it gave her relief. As the day the sore was completely healed."

Mrs. E. COCKEN, Yorkton, Sask.

Reedy Nail Pierced Finger—
"I ran a rusty nail over my thumb nail while at work. The pain was terrible as I had been working hard. I rubbed my thumb with Zam-Buk, and in a few minutes the pain was completely gone. Zam-Buk is a wonderful remedy, and it stopped the pain almost instantly. It kept away inflammation and in a few days the wound was quite healed. It kept away inflammation and in a few days the wound was quite healed."

Mrs. A. H. COCKEN, Yorkton, Sask.

A Bad Bruise—
"In moving some boxes in the store, I injured my thumb very badly. In a few minutes it was covered with a white blister, and the pain was very bad. Zam-Buk was applied, and in quick time it gave me relief. It kept away inflammation and in a few days the wound was quite healed."

Mrs. E. COCKEN, Yorkton, Sask.

Take this Advice!
If you have some sore place, some skin disease, or cut, or burn, or bruise, or any other injury, you will find that Zam-Buk is a wonderful remedy. It keeps away inflammation and in a few days the wound is quite healed. It keeps away inflammation and in a few days the wound is quite healed."

Mrs. E. COCKEN, Yorkton, Sask.

Capitals

Capitals Won Bowling League Championship

Nationals Made a Great Bid for the Title But Lost Two Out of Three Games Last Night—Gonell Made Score of 245—Nationals Had Big Margin in Total Pins.

The Capitals captured the championship of the "Brimley" Bowling League last night by defeating the Nationals two out of three games. Thus the Capitals win four out of the final series of five games played to decide the championship, but the Capitals had to go the limit to win and they were very lucky to get off with the title at that.

Last night's games were watched by the biggest crowd which has ever been inside the Olympic bowling alley. Every place in the building where it was possible to get a view of the game was filled with enthusiastic, interested spectators. The Capitals won the first game by a score of 177 pins to 117 pins and it looked to be all over with the Nationals when they were defeated by a score of 189 pins to 117 pins.

Captain Tom McCullum was high man with 214. Grit was next with 192 while Harmer and 181. Each contributed 187, while Ben each was low with 177.

Capitals Won Over.
The Nationals started the second game at almost as fast a pace as the first game, and up until almost the end of the game appeared to have the championship and medals nicely tucked away. At the half-way mark the Capitals had taken the lead by a score of 189 pins to 117 pins.

Captain Tom McCullum was high man with 214. Grit was next with 192 while Harmer and 181. Each contributed 187, while Ben each was low with 177.

Gonell saved the day for the Capitals. It was his 245 score in the second game which paved the way for the Capitals' victory. The Capitals won the third game by a score of 189 pins to 117 pins.

The Capitals' victory was a comparatively easy victory by almost one hundred pins.

Although Gonell contributed a high individual score and saved the day for his team in the second game, Harry Chapman did the best and most consistent work of the evening. He was not in a condition to bowl, but he showed all kinds of hand, and finished with 766, the high score of the evening. His single score was 182, 199 and 226.

Her Miller had an off-night while Willmer, could not find the groove to save his soul. Abrams bowled a steady consistent game.

The Nationals were all in fairly good form and every man went well over the 200 mark in the first game.

The following are the detailed figures:

Capitals	Nationals
Gonell.....186 157 160 187 147 245 198-1253	Harmer.....167 132 142 156 187 147 181-1108

TOLDO BOWLING TOUR.
Toldeo, Ohio, March 6.—The Hudson Stars of Newark, N. J., were the surprise of the tour as they won the first game of the tour by a score of 246 pins to 117 pins. The Capitals were the first team from the east to compete in the tour. The Capitals won the second game by a score of 189 pins to 117 pins.

The Capitals' victory was a comparatively easy victory by almost one hundred pins.

Although Gonell contributed a high individual score and saved the day for his team in the second game, Harry Chapman did the best and most consistent work of the evening. He was not in a condition to bowl, but he showed all kinds of hand, and finished with 766, the high score of the evening. His single score was 182, 199 and 226.

REFUSED PERMISSION TO PLAY FOR ALLAN CUP

Montreal University Unable to Come West Owing to Examinations

Special to the Bulletin.
Toronto, Mar. 6.—The University of Toronto hockey team, champions of the intermediate Union, hung up their skates today for the season, following a decision of the Athletic Directorate, refusing the players permission to go west next week to play Winnipeg for the Allan Cup.

Yesterday received a telegram from Win. North, of Montreal, ordering the hockey team to leave for Winnipeg tomorrow night, to play the holders two games on Tuesday and Thursday of next week. The players held a meeting and decided to refuse the offer, which was put up in the athletic directorate, permission was refused, on account of interference with studies coming on to examination time. This decision was communicated to the Allan Cup trustees.

RECORDS ARE SMASHED AT N. Y. MEET

Patrick McDonald Broke World's Record for 24 lb Shot Put at A.A.U. Meet

By Bulletin Leased Wire.
New York, Mar. 6.—One world's record and a new American record were made at the annual indoor championship of the A.A.U. at Madison Square Garden tonight, where the amateur athletic union held its annual indoor championship.

The new world's record was made by Patrick McDonald, the New York policeman, who won Olympic honors last summer. McDonald broke the 24 lb shot put record of 141 feet, 10 inches, made by him in 1908, by throwing it 147 feet, 10 inches.

McDonald's throw was a record for the 24 lb shot put, which he had held for 141 feet, 10 inches, in 1908. He broke the record of 141 feet, 10 inches, made by him in 1908.

McDonald's throw was a record for the 24 lb shot put, which he had held for 141 feet, 10 inches, in 1908. He broke the record of 141 feet, 10 inches, made by him in 1908.

Moose Jaw Will Not Play Eskimos Unless Ordered To

Baskatchewan Champions Have Doubt Regarding Eligibility of Eskimos—Have Wired Challenge for the Allan Cup, Asking Dates Some Time Next Week—Will Raise Funds.

Moose Jaw, Mar. 6.—The Moose Jaw champions of the S.A.H.A., have already wired their challenge for the Sir Montague Allan Cup to the trustees at Montreal. This was done after the game with Prince Albert in Saskatoon, but so far no answer has been received from either Montreal or Winnipeg.

They Doubt Eskimos' Eligibility.
The Moose management received a wire from Deacon White, manager of the Edmonton Eskimos, while the team was in Saskatoon, asking that the Moose players be played between the Eskimos and Moose, the winner to challenge for the Allan Cup as champions of Saskatchewan and Alberta. The decision reached by Manager Law is that there will be no game between the Edmonton crew and Moose Jaw, unless the trustees order the game played with Moose Jaw as the only team to play.

In the first place, it is doubtful if the Eskimos are eligible to play when one considers the fact that they failed to defeat the team in the game played for the right to enter the Alberta finale. In the second place, it is also very doubtful whether Calgary Shermans have the right to award the championship to the Moose Jaw team for the fact that the Moose Jaw team was secured until such time as the A.A.U. investigated charges of professionalism laid against a member of the Moose Jaw team. Shermans' representative was over the Moose Jaw and apparently instructed Moose Jaw to be played with the challenge for the Allan Cup in behalf of Moose Jaw.

Subscription Will Be Started.
As soon as it is definitely ascertained just what dates games can be played, the Moose will start a subscription list for funds which will make the trip. It is a long haul to Winnipeg with much additional expense with the team remaining three or four days. The boys have brought to Moose Jaw the city's full contingent of supporters, and they are sure to be a big help in securing their loyalty to the winners of the blue and grey by subscribing generously, in order that the expenses may be covered, and the Moose Jaw team may be able to make the trip.

WALTER RAMSAY THE CALGARY WILL TOSS THE FIRST BALL CALLIES AT LAST PAY UP

School Board Chairman Also Donates Cup for P. S. Basketball League

Friday afternoon at the Y.M.C.A. at 4:15 sharp, the public school basketball league will be formally opened and games will be played. Friday afternoon and Saturday morning will be the first games of the season.

Mr. Walter Ramsay, chairman of the school board, will toss the first ball. All teachers and pupils are welcome to attend the games. The chairs in the gallery are reserved for the adults.

The league has been divided into two sections, the former consisting of the schools closed, and the latter, including the schools open. The league has been divided into two sections, the former consisting of the schools closed, and the latter, including the schools open.

Your Watch is safe with us.

JOHNSON & HUBBS
129 Jasper W.

AROUND THE CITY

Edmonton Improvement, No. 2 LOCAL, will meet in their hall, North-west corner, Jasper avenue, this evening, when the patriarchal desire will be conferred.

A false alarm tripped in from May street gave the true brigade from No. 1 hall an unnecessary run last night. Street car derailments on the South side, during the past few days, have resulted in a very inferior service, with overcrowded cars and poor connections.

CHINESE Y.M.C.A.
At the monthly meeting of the Y.M.C.A. board, held last night, the principal subject of discussion was the installation of a Chinese branch of the Y.M.C.A., and the matter will be gone fully into during the coming week. It was pointed out at the meeting the great need of something to offset the apparent lack of influence that always seem to affect a Chinese colony in a great American city.

RECEIVED TO-NIGHT

The recital to be given this evening in the lecture hall of First Presbyterian Church, by Miss Cottrell, Fleming and Mr. O. H. Cook will be a most interesting and varied program. Miss Fleming is a western girl, born in Manitoba, who went to New York, where she made a special study of her art for a number of years. Wherever Miss Fleming has played in New York, Philadelphia and other large centres, she has had the most appreciative reception, and great notices.

A smoking concert will be given this evening at eight o'clock by the 101st regiment Edmonton Fusiliers in the Overseas Club Room in the Sandhill Block, Jasper avenue. The program will consist of musical numbers by local artists, both in songs and recitations and the regimental band will be in attendance. All members of the regiment will be attended in uniform. During the evening there will be a prize drawing and a prize will be awarded, also the cup prize won during the recent recital at the armory.

HOLD ANNIVERSARY SERVICES

Edmonton Presbyterian Church anniversary will be celebrated on Saturday night, when special services will be preached by Rev. Alex. Ester, M.A. of Grace Church, Calgary, and formerly of Cooke Church, Toronto. Mr. Ester is a gifted preacher and orator, and his services are much appreciated at Sabbath's rich text is in store.

IN THE HOTEL CORRIDORS

Mayor J. H. Woods of Athabasca Landing, is in the city, registered at the Hotel. He is the first to say that the waterworks system which the town is installing at a cost of \$100,000 will be completed about the middle of May. The big trench for the various mains laid October will start work again about the middle of the month. When the work is completed, Athabasca Landing will have one of the most up-to-date systems of the small type in the west. On a high hill only a short distance from the centre of the town a tank with a capacity of half a million gallons is under construction and the city will thus get a city water service. Speaking of the installation of the water works Mayor Woods stated that the council had voted \$100,000 toward the cost of the water works. He was required and he is of the opinion that the financial stringency that the balance will be forthcoming. While in the city Mr. Woods will confer with Fire Chief Laidlaw regarding some apparatus.

W. R. Stewart, a well known pioneer of Peace River Crossing, is registered at the Windsor. He is a resident of the city at the various hotels. Most of them are making flying visits to the city and will return within the next two days so as to make the trip before the break up.

Andrew Greer, for some time special officer at the Y.M.C.A., leaves this morning for Peace River Crossing to look over some land holdings. In that district, Arthur Shute, brother to Inspector Shute, will take over the position at the Y.M.C.A.

P. Pierce, well known railroad engineer, has been transferred to the Peace River Country. It is Mr. Pierce's intention to take up some extensive land holdings for himself and brothers.

W. Muloney, of the International Hotel, accompanied by Mr. Hall, called yesterday afternoon to see a new Cadillac car to make the trip to Calgary. This is probably the first car to attempt the trip since last fall.

A smoker and several sporting bouts will be held at the Grand View Hotel on Saturday evening. The Grand View orchestra will be in attendance. The number 14 being held at the request of the B.L.L. of A. All friends and members of the organization are cordially invited.

That in Bronson in Astoria, New York, Mar. 6.-The writ of habeas corpus obtained in behalf of Harry K. Thaw, suddenly was withdrawn at the request of the counsel in the supreme court today; no explanation was offered. Thaw was in court. William Traverser, Detroit was ready to proceed with the argument, but one of Thaw's lawyers notified Justice Giergisch that he desired to withdraw the proceedings.

HEAR REPORT ON EAST END CAR EXTENSION

Meeting Held Last Night in Alberta College, First Street, when East-end car extension and plans discussed for meeting with City.

A very successful meeting of East-end car project owners was held in the Alberta College, First Street, last night. The meeting was called for 8:30 o'clock, and by that time more than seventy persons were present. A definite and permanent organization was formed, the officers being as follows: President, Mr. Wallace; Vice-president, Mr. Cope; Secretary-treasurer, Mr. Hume. Three permanent committees were also appointed, viz., an executive committee, a finance committee and a district committee.

Mr. Johnston, acting for Messrs. Drelich & Knittel, gave a full and detailed report of the survey. The route under consideration covers a distance of seven miles, running due east from Watt street, in Forest Heights, on St. Catherine street, through the old golf grounds, thence south to the Clover hill road, then east to a point south of the Great West Hotel, and north to the mine, returning from the north-west corner of the mine, via the Heights, one-half mile south, then due west to meet the city extension south.

Mr. Johnston was unable to give a complete estimate of cost, on account of the fact that he was unable to obtain plans of construction. He will be in a position to do so early in the coming week.

The executive committee will take steps immediately to complete arrangements with the Edmonton Gravel and Sand Company and Great West Coal Company. The two companies will place their products upon the electric line, thus securing the transportation of their products. As soon as these arrangements are made, the complete estimates of costs are in the city committee will place the whole matter before the city for its approval.

AT THE HOTELS.
